

Air vents

Tunal TOP Neo air vent | DA-51*

- Over frame window vent, mounted on the upper part of the aluminum frame structure, which improves the airflow and makes it possible to adjust rooms to the required ventilation standards in the absence of other ventilation systems.
- Standard air vent parameters: color from the RAL palette, acoustic insulation 29 dB, flow $83 \text{ m}^3/\text{h}$ per running meter at negative pressure (10 Pa), $U_f = 1,8 \text{ W/m}^2/\text{K}$.
- Fast Click-In fastening to the aluminum frame
