

## Pane bars and decorative lists

Pane bars are a perfect addition to any window. They can be not only a decoration of stylish windows but also a top element of modern window constructions. Pane bars give the interiors the exceptional ambience and, due them, the building facades acquire the unique character.

### Inside pane bars

Inside pane bars are placed in the space between glasses during the production of glass packets. We offer inside pane bars 8, 18, 26, 45 mm wide. They are available in a wide range of RAL colors as well as in a few wood-like shades.

## Pane bars and decorative lists

### Stick pane bars

Stick pane bars are placed directly on the glass which allows the pane bars to be stuck and exchanged during the window use. We offer stick pane bars 25, 40 mm wide. The colors are available in accordance with Baualu PVC window colors.

Pane bars and decorative lists  
**Decorative lists**

Decorative lists and caps are the elements which give charm to windows. They are suitable both for historical and single-family buildings. The lists are made of polyester and covered with high quality two-component varnish.
