

## Fittings

Baualu windows owe their functionality to high quality components, in particular solid fitting solutions. It is due to these elements that smooth operation of even large windows is possible without any effort. The fittings also guarantee the proper tightness of the windows and increase the level of security due to the use of anti-burglary elements. Discover the most popular fittings functions.

### Fittings

#### **Standard plus fitting**

- The STANDARD PLUS fitting is equipped with two anti-burglary catches in each sash.
- In Tilt and Turnsashes one of the catches is a unique anti-burglary lock with double locking, available at Baualu only.
- Additionally, the fitting features a handle rotation lock with a lifter.

### Fittings

#### **Invisible hinges**

- When the sash is closed the hinges are invisible what gives the windows exceptionally elegant appearance and facilitates keeping the windows clean.
- A great advantage of the fittings is an easy regulation without using the tools.

### Fittings

#### **'comfort' fitting**

- The system enables the sash from the frame at a distance of 6 mm to be disengaged what ensures efficient ventilation without cooling the interior suddenly.
- During ventilation the fitting has an increased level of protection against burglary and the vertical position of the handle does not show that the window is unsealed.
- The sash maintains a stable position under wind pressure and the slot dimensions allow the interior to be ventilated during the rain.

## Fittings

### The 'tilt first' option

- The FIRST TILT option, in which positioning the handle horizontally tilts the window, and full opening requires setting the handle in a vertical position.
- In combination with the TBT handle it allows to limit the possibility of opening the sash.
- Without using the key, they can only be tilted, which eliminates the risk of falling out.
