

REPLACING FUEL CONTAINER

1. Turn the device on by pressing .
2. If the fuel container is empty (**START/STOP BUTTON BLUE LIGHT ON**), unscrew the cap with the pumping hose and remove the container from the holder (**BLUE LIGHT FLASHING**). (I)
3. Insert a full fuel container with a cap removed (II) and screw the cap with the pumping hose back on (III). (**START/STOP BUTTON GREEN LIGHT ON**)

FLAME IGNITION

When the **START/STOP** button is lit up in green, the device is ready to be launched.

Press **START**. Firing up of the device takes from 2 to 10 minutes (**FLASHING GREEN LIGHT**). During the process of firing up, scent of fumes can be present. When the lights stop flashing, the device is lit up and has reached the working temperature.

FLAME HEIGHT REGULATION

When the flame is on, press the  or  button on the remote or scroll the flame level bar in the mobile app to choose one of the six flame heights. The flame starts on height 4 by default.

NOTE. In case of too high a temperature of the device, the flame height will be automatically decreased and locked from changing. If the temperature continues to increase, the flame will be extinguished (**RED LIGHT**)

FLAME EXTINGUISHING

To extinguish the flame:

-press **STOP**.

Flashing red light indicated the device being cooled. Restarting the flame is possible only after complete cooldown of the device (**GREEN LIGHT**).

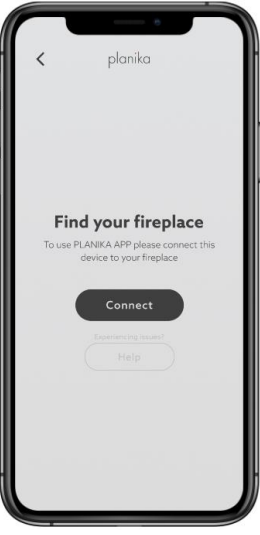

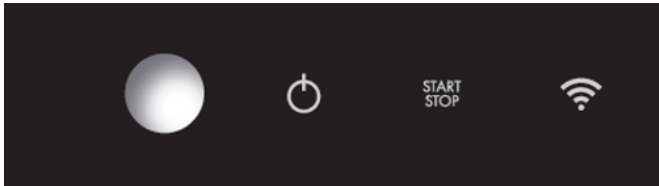

TURNING THE DEVICE OFF

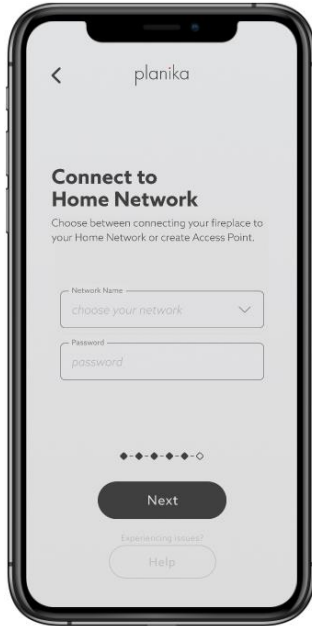

To turn the device OFF, press .

The device will automatically turn off in case of any work related errors. (check the error in the mobile app).

WIRELESS CONTROL CONFIGURATION

To pair the device with the mobile app (simultaneous pairing of more than one device is not possible):

<p>Join the newsletter</p> <p>1. Launch the FLA3 NET-ZERO mobile app. Join the newsletter by submitting your e-mail address and pressing SIGN UP or simply press SKIP.</p> <p>Google play Appstore</p>  		<p>Find your fireplace</p> <p>2. On the FIND YOUR FIREPLACE screen press CONNECT to start the network search.</p>	
<p>3. Press and hold the WiFi button  on the fireplace. When the button starts flashing, the fireplace is ready to be paired for 5 minutes.</p> 			
<p>Setup Network Active</p> <p>4. Go to mobile device setup, turn on the WiFi network and connect with Fireplace_WiFi_setup (if the network is not visible, unplug the device for 10 seconds and retry the configuration). The fireplace will be automatically found by the mobile app, which will be confirmed by the app (SETUP NETWORK ACTIVE). Press CONNECT.</p>		<p>Connect to Home Network</p> <p>5. On the CONNECT TO HOME NETWORK screen, choose the name of the network which you plan to use by default (NETWORK NAME) and submit its password. Make sure the password is correct and hit (SUBMIT).</p>	

Your fireplaces		Access Point	
<p>6. On the following screen (YOUR FIREPLACES), choose your device and press CONNECT. The screen also allows you to change the name of the fireplace (EDIT).</p>		<p>7. You can also create a dedicated network ACCESS POINT and connect directly with the device. To do that, press (HELP), choose (CONNECTION TYPE), and (ACCESS POINT), then confirm by pressing (CREATE ACCESS POINT). Submit new name for the network and the password. Confirm by pressing NEXT.</p>	

After successful configuration, the WiFi button will light up in green.

FUEL - Use only ethanol fuel produced from plants in the process of two-time alcohol distillation consisting of 95-96.6% ethanol by volume. Fanola is the recommended fuel with pharmacological purity.

DO NOT USE SYNTHETIC PETROLEUM BASED FUELS AS THEY ARE CONTAMINATED, EMIT UNPLEASANT ODORS AND CAN DAMAGE THE FIREPLACE! DO NOT USE FUELS CONTAINING 100% ETHANOL BY VOLUME, GEL, OR AROMATIC FUELS!

CLEANING – Clean with a damp cloth and delicate detergents, only when the device is turned off and cooled.

SERVICE – Keep the provided USB cable for service. Reach out to us at service@planikafires.com.
